# New Mineral Design System

Version 1.0.0 — Last updated: 2024-03-15

Get started

## Overview

New Mineral is a comprehensive design system built to create consistent, accessible, and beautiful digital experiences across all platforms and products.

## About Us

### New Mineral

Our mission is to empower designers and developers to build high-quality digital products faster by providing a shared language, reusable components, and clear guidelines that work for everyone.

- Consistency
- Accessibility
- Efficiency
- Scalability

## Problem

Inconsistent UI, duplicated work, and long onboarding times slow down product teams and frustrate users.

## Solution

Centralized, well-documented components and tokens that teams can adopt with confidence.

## Outcome

## Information Architecture

## Feedback

## Design Process

## Design Principles

Clarity over cleverness

Consistency builds trust

Accessible by default

Design for real content

## Design Language

Color

Typography

Spacing

Motion

## Grid System

| Breakpoint | Columns | Gutter | Margin |
|---|---|---|---|
| Mobile | 4 | 16px | 16px |
| Tablet | 8 | 24px | 32px |
| Desktop | 12 | 24px | 64px |
| Wide | 12 | 32px | 120px |

## Layout Principles

Whitespace

Hierarchy

Alignment

Proximity

## Responsive Behavior

| Component | Mobile | Tablet | Desktop |
|---|---|---|---|
| Header | Collapsed | Compact | Full |
| Navigation | Drawer | Top bar | Top bar |
| Sidebar | Hidden | Collapsed | Expanded |
| Footer | Stacked | Stacked | Columns |

## Component Architecture

Atoms

Molecules

Organisms

Templates

## Ideology

| Principle | Description |
|---|---|
| Clarity | Every element has a purpose |
| Consistency | Patterns repeat predictably |
| Accessibility | Usable by everyone |
| Efficiency | Fast to build and maintain |

## Competitor Analysis

| Feature | Us | Competitor A | Competitor B | Competitor C |
|---|---|---|---|---|
| Open source | Yes | No | Yes | No |
| Dark mode | Yes | Yes | No | Yes |
| Accessibility | AA | A | AA | A |
| Documentation | Full | Partial | Full | Partial |

## Research Report

Research Report

## Strategy

| Goal | Metric | Target |
|---|---|---|
| Adoption | Teams using the system | 80% |
| Consistency | Visual regressions per release | < 5 |
| Speed | Time to build a new page | -30% |
| Satisfaction | Designer NPS | > 50 |

## Retrospective

### What went well

- Shipped the core component library ahead of schedule
- Strong adoption across three product teams in the first quarter
- Design and engineering collaboration improved noticeably

### What could be improved

- Documentation lagged behind component releases
- Onboarding for new contributors was too ad hoc
- Visual regression coverage was inconsistent

### Action items

- Add a documentation checklist to the release process
- Create a contributor guide and pair-programming sessions
- Expand visual regression tests to all shared components

### Next steps

- Publish the v2 roadmap
- Run a follow-up survey with product teams
- Schedule a quarterly retrospective
