

Cafe Yi

Public Sector Advisory | Service Design | Content and Information Architecture

Wellington, New Zealand | cafeyee@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFILE

Public sector advisory, service design and content design professional with 18+ years of experience across digital service improvement, accessibility, information architecture, stakeholder engagement and complex built environment delivery.

I help teams clarify complex problems, connect user evidence with delivery constraints, and turn service ideas into clear, practical and implementation-ready outcomes.

CORE STRENGTHS

- Plain English and content design
- Information architecture
- Accessibility focused pathways
- Usability testing and research synthesis
- Stakeholder engagement
- Implementation readiness
- Work programme coordination
- Service pathway mapping
- Visual explainers and structured layouts
- Vendor and quality coordination

TOOLS

- Figma
- Miro
- Microsoft Office
- Microsoft Clarity
- Adobe Creative Suite

EDUCATION

Master of User Experience Design

Victoria University of Wellington, 2025 to 2026, Graduate with Distinction.

Bachelor of Architecture

South China University of Technology, 2002 to 2007.

RECOGNITION

- Microsoft Content Development and Management, 2026
- Google Project Management, 2026
- Google AI Essentials, 2024
- Class 1 Registered Architect of China
- Professor level Senior Engineer, Architecture
- 10+ national and provincial industry design awards

LANGUAGES

- Mandarin, native
- English, professional fluency
- Cantonese, professional fluency

SELECTED EXPERIENCE

Principal Advisor

Ministry of Justice, New Zealand | Wellington | Mar 2026 to Jun 2026, fixed term

- Led a public-facing website content and service information improvement under the Justice Sector Directorate Victims Programme.
- Owned scope definition, stakeholder engagement, research, information architecture, plain English writing, prototyping, usability testing and delivery handover.
- Restructured fragmented victim-related information into a clearer pathway and dedicated entry point on the NZ Police website.
- Used comparative usability testing to evaluate content clarity, task completion, ease of use and completion time before final content iteration.
- Produced implementation-ready handover documentation and next-step recommendations to support future content maintenance and go-live readiness.

Deputy Director

ADG Studio, Guangdong Architectural Design and Research Institute Group Co. Ltd. | China | Jan 2024 to Jan 2025

- Served as deputy team lead for a 20-member multidisciplinary design team, overseeing project operations, workforce planning, governance, stakeholder communication, staff training and technical recruitment.
- Completed 34 design projects, including one shortlisted proposal and three winning bids, while contributing to average output value of NZD 1.6 million per person and 8.3 percent year on year growth.
- Coordinated outsourced specialist vendors and consultants, clarifying scope, deliverable requirements, timelines and quality expectations.
- Produced a modular project portfolio to support business development, improve content reuse and reduce maintenance cost.

Architect to Deputy Chief Architect

ADG Studio, Guangdong Architectural Design and Research Institute Group Co. Ltd. | China | Mar 2009 to Mar 2024

- Contributed to more than 3.4 million sqm of designed projects, including approximately 1.15 million sqm of completed built work across public, transport, sports, cultural and commercial environments.
- Led teams of 10 to 15 members across concept, documentation and implementation stages, managing schedules, workflows and deliverable quality.
- Developed strong visual communication, information structuring and stakeholder presentation skills through complex public, transport and civic projects.

SELECTED PROJECTS

NZ Police Victims Hub

Public-facing service information and content design | 2026

- Created a dedicated victim information channel by consolidating fragmented information into one hub page and five sub-pages within the existing NZ Police website structure.
- Developed audience-centred information architecture, plain English content, tone principles and page structures to improve findability and user confidence.
- Delivered measurable improvements in the tested experience: task success increased from 66.7% to 88.9%, average ease improved from 2.67/5 to 4.17/5, and median task time reduced from 140 seconds to 82 seconds.
- Produced implementation-ready handover documentation and next-step recommendations for the receiving team.

Accessibility Support Hub

Accessible service pathway and public service prototype | 2025 to 2026

- Designed an accessibility-focused public service prototype for Ministry of Justice court support information, using the court interpreter request as an end-to-end case.
- Led a three-person team across stakeholder engagement, service blueprinting, information architecture, prototyping and usability testing.
- Conducted an on-site field visit to understand court accessibility conditions, improving content accuracy and connecting digital support pathways with the real service environment.

Studier

Research operations and lightweight product design | 2026

- Designed and built a lightweight internal research operations tool within one week to support customised usability testing for a public sector project.
- Created a dashboard style task management interface for viewing, creating, publishing and managing user-generated testing tasks.

Selected Built Environment Work

Public buildings, civic environments and long lifecycle delivery

- Worked across major public, transport, sports, cultural and commercial projects, with a focus on complex systems, stakeholder coordination, quality assurance and long lifecycle delivery.
- Built practical understanding of accessibility as part of a wider service and delivery system, including cost, construction, operation, maintenance and long term use.

Selected public sector case studies in the portfolio are password protected. Content can be shown in person.
